Subject:	Summary: Recognition of compounds from a connection table

Software Archive

An archive of computation chemistry related software,

List Archive

An archive of all past messages on the ccl mailing list,

Data Archives

Collections of data sets of use to computational chemists,

Document Archives

Collections of faq's and other documentation for various different programs,

Search CCL

Text Search, RegExp Search,

Some time ago, I posted the following question:

"Do you know of any references that deal with the recognition of compounds (e.g stored in a compound library) from their connection tables?"

I received two answers. Thanks a lot.

===

Try Ash, J., Chubb, P., Ward, S., Welford, S., Willet, P., Communiaction, Storage and Retrieval of Chemical Information, Ellis Horwood Series Chemical Science, Ellis Horwood Limited, Chichester, 1985.

It is not new, and some important modern developments are missing, but is is still a good overview about the basic principles and technology.
